

Extract your first data

Hello world!

Welcome to your first document

4 part series

Inside documents,
powerful data slumber—
awaken them now!

👉 See the left pane? It's a SenseML query that extracts text from this PDF.

👉 Now see the right pane? It shows the extracted text.

How does it work? Sensible *anchors* on "Hello world!" to get close to the target text, then extracts the target, "Welcome to your first document," with a *method*.

Now let's see what happens when you...

Make this change in the left pane

Replace	With	Results
"hello world!"	"powerful data"	Grabs last line of haiku in the box above

Mix it up

Make some more changes. After each one, notice the results in the right pane 👉

Replace	With	Results
"position": "below"	"position": "right"	Grabs rest of anchor line
"id": "label"	"id": "box"	Grabs box, minus anchor
